

Conference Core Topics

We particularly invite contributions to innovative new topics like:

1. Bodies and relationships: Neurobiology in couples, families and family medicine
2. Across the fence: in dialogue with buddhism, logics, psychoanalysis and others
3. Political-societal conflicts and their resolutions
4. Refugees: their hopes, traumas and resources
5. The modern organization and its managers: fluid? agile? multirational?
6. Healthy workplaces: How to survive the modern jobs?

But we are equally open to contributions from all other approaches and topics of systemic research and systemic practice

We strongly welcome research methodology workshops on:

- Psychobiological measurement for couple and family therapy
- Research based therapy feedback
- New process and outcome research measures
- Simulating change in dynamic systems
- Measuring synchronicity
- Manualizing systemic therapies and conducting rct-studies
- Discourse analysis
- Grounded theory
- Action research and case studies
- All other methodology suitable for systemic research

And we invite offers to plan, organize and/ or contribute to Symposia on:

- Bodies and relationships: Neurobiology in couples; embodiment; neuro psycho Immunology ; family systems medicine
- Specific systemic therapy approaches for specific clinical problems (e.g. anxiety, psychosis, depression, drug abuse, adhs, borderline/ self harm, trauma, mental retardation, family violence, , school absenteeism, mobbing and many others)
- How effective is systemic therapy or consultation (outcome research), and what works in systemic therapy or consultation (process research)?
- Across the fence: Systemic thinking in dialogue with buddhism, formal logics; dialogic practice, psychoanalysis and other schools of thought
- Political systems: Social (in)equality and mental health; alternatives to poverty; violent conflicts, wars and conflict mediation
- Refugees across the world: challenges for social policy, social work, health services and psychotherapy
- The modern organization: Fluid/ agile organizations; multirational and paradox management; conflict resolution; strategy; learning organizations; networks and organizations; the limits of change management
- Healthy workplaces: How to survive the modern jobs?
- All others topics of systemic research
